MR57 embodies the pinnacle of Armi Perazzi's know-how, engineered to optimize balance, control, and shooting performance. A fully redesigned receiver improves mass distribution with rearward balance, enhancing stability, responsiveness, and consistency while reducing perceived recoil. Redesigned forcing cones and ultra-light interchangeable chokes refine shot pattern, velocity, and balance without sacrificing durability. Perazzi's proven mechanical system remains un-

changed, maintaining long-established reliability and longevity. In-house high-performance steel barrels ensure consistent ballistics and support steel shot ammunition. A custom-fitted stock with redesigned ergonomics delivers seamless continuity between control and swing.

Essential and functional aesthetics reflect Perazzi's identity.
